

Homeowner Association Roof Replacement Planning & Budgeting for Future Success

CERTIFIED MANAGER OF COMMUNITY ASSOCIATIONS (CAMICB) CONTINUING EDUCATION

PROGRAM DESCRIPTION:

The purpose of this program is to educate Community Association Managers on the importance of roof replacement planning for common interest developments. By providing this course to and educating Community Association Managers, they will have a better understanding of the significance of the reserve study to roof replacement and how this can open up roof design considerations leading to more durable, energy efficient, and resilient roofing solutions.

This CEU presentation will also educate Community Association Managers on environmental and performance considerations that will make them an important resource to the board of directors so they can be highly informed on roof solutions. Five out of every one hundred homes in America encounter a claim each year. Wind, hail and water related weather damage account for approximately 50% of insurance claims. For homeowners that are part of a common interest development the education provided by the community association manager is critical to ensuring they are properly insured and educated on the HOA responsibilities. Community Association Managers are a key component for material selection by board members and owners that are part of an association when capital improvement projects occur.

LEARNING OBJECTIVES:

1. Common interest developments and why roofing should be a priority in planning
